## **Capt. Trey's Fishing Report**

Hey folks! We are all so blessed this winter around Northwest Florida with mild days and cool night temps. If the water stays somewhat mild with the cool winter and water temps rising, we could very well see some late winter fishing action.

**Inshore**: Look for Spanish mackerel, Trout, Redfish, Bluefish, Sheep head, Pompano, and Cobia is starting to show in the water NOW! **Offshore**: The offshore bite late winter should be good for Be liner, Trigger, Grouper, and Black Snapper available. The Red Snapper and Amberjack most likely will have some restriction on them in the state and/or federal waters out past 9 mi., so be sure to check with [www.myfwc.com](http://www.myfwc.com).
